	The barracks in Planitzstrasse, Chemnitz, are occupied by Soviet Infantry and a transport section. The total strength is about 250 men. In addition, seven self-propelled guns of SU 100 type have been stationed here since the end of the autumn maneuvers. No activities of these guns are observed at the present time. Exercises are held only with infantry arms in Küchenwald Park and The Lessigwald.	
	About 20 wooden cases, painted blue, were unloaded from a Soviet truck in Jagdschaukenstrasse, Chemnitz, on 4 Dec 53. They are believed to have contained crygen equipment.	
7.	The Soviet units quartered in the former factory building at the Scharzenberg (Erzgebirge) railway station received new guns at the end of Nov 1953. The old 76.2 mm short barreled antitank guns were taken away and replaced by 12 new guns of about 85 mm caliber, with muzzle brakes. The gun carriages have exceptionally small wheels.
